1. How to project to Philips Interactive screen from Instructor PC in Podium

The following steps outline a summary of projecting from the **Instructor Machine** on the **podium** to the Philips **Smart-screen** on the walls.

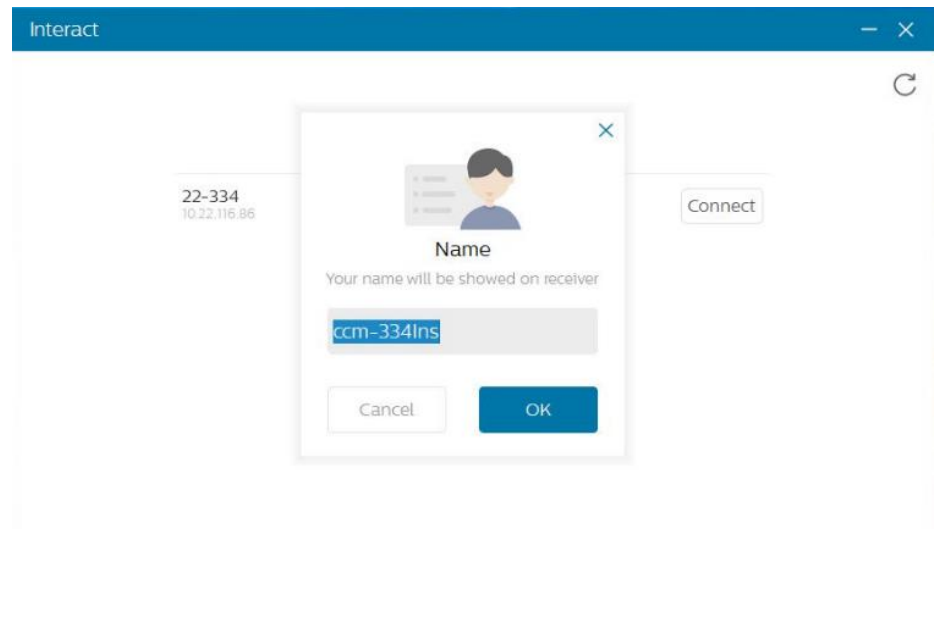

1. Power Button

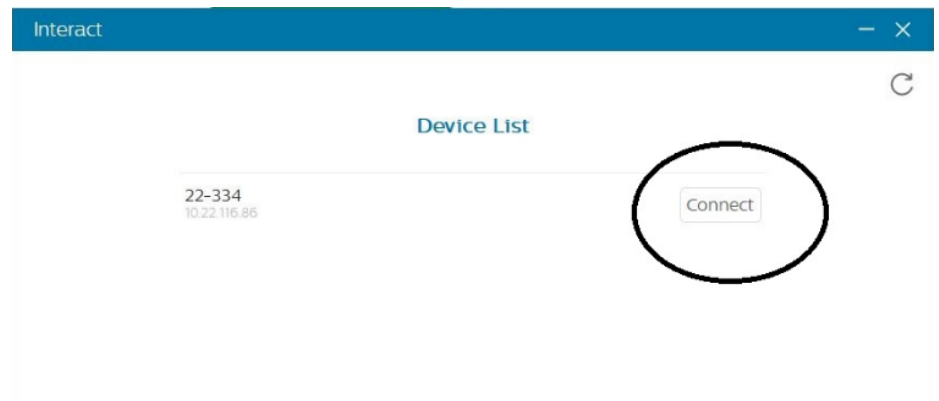

2. Run the application "Interact"

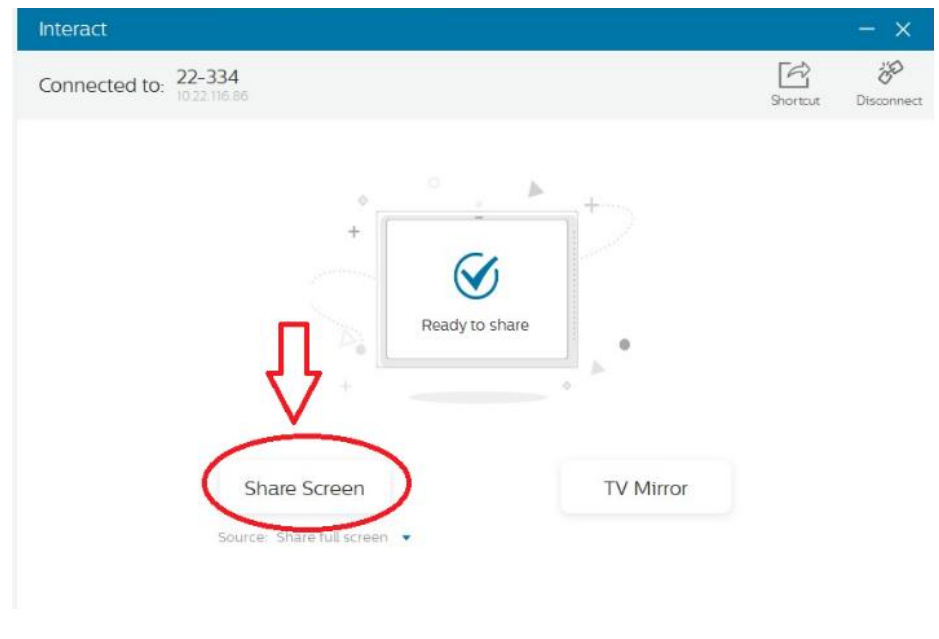

3. Give the appropriate name and click **OK**.

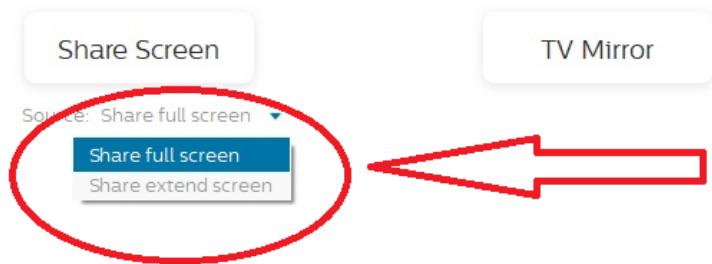

4. The name of the smart screen will be shown. Select according to your location and click **Connect**.

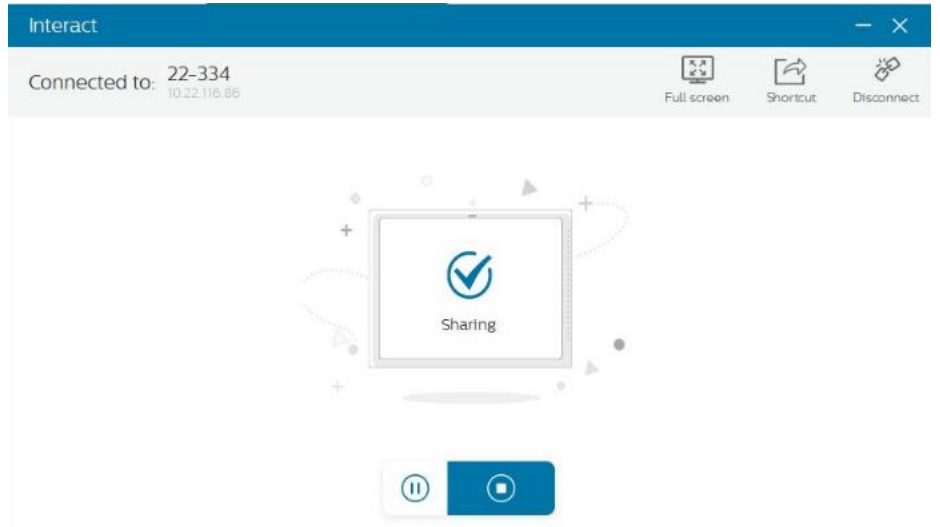

5. Choose "**Share Screen**" to project on the smart screen. (TV Mirror will show smart-screen content on instructor's PC in the podium)

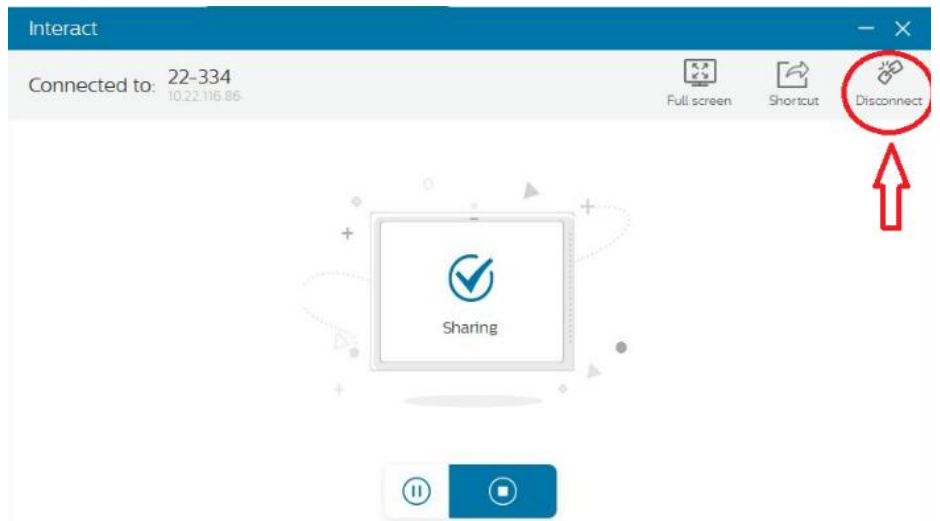

6. Advanced options available: “Share Full Screen” and “Share Extended Screen”. Choose accordingly.

7. Screen sharing successfully started.

8. Click on “Disconnect” to disconnect.

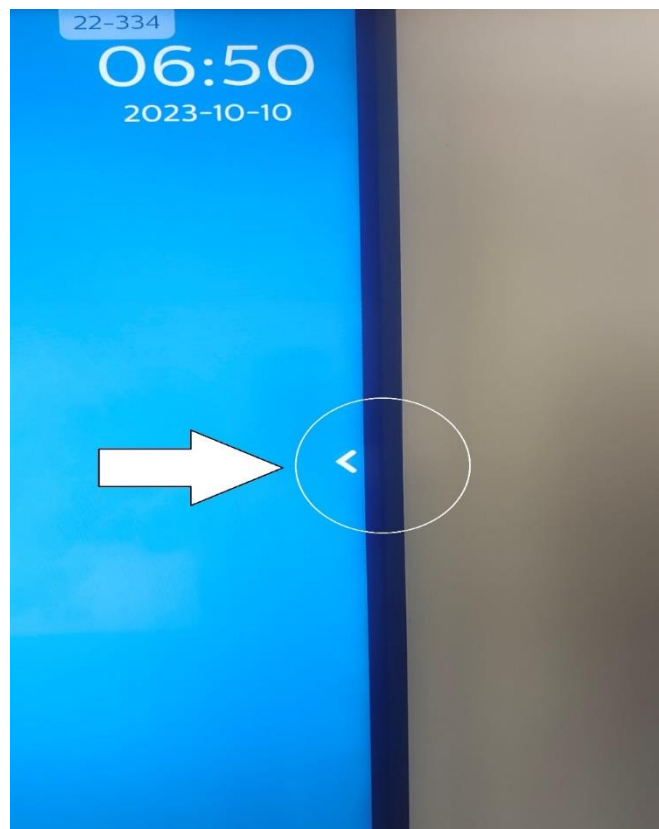

2. How to connect a Laptop to Philips Interactive screens

1. Connect your laptop to “Kfupm Wi-Fi”.
2. Install “Interact Software” from the QR Code or link as per the OS of your device.

Software

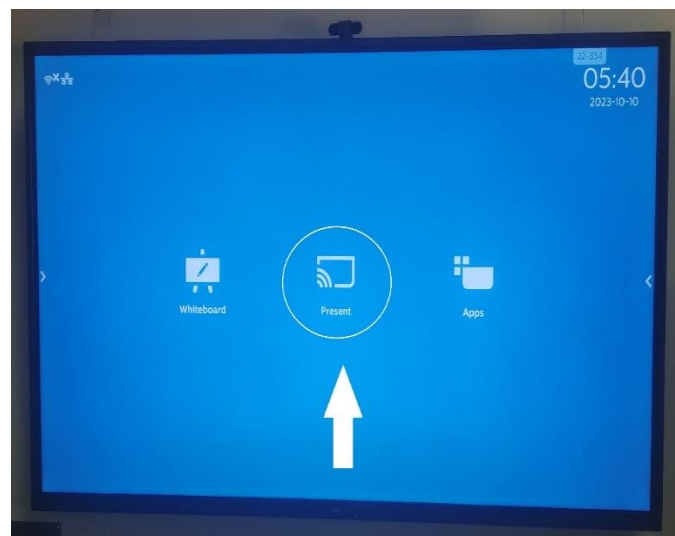

3. Launch the “Interact” application and follow steps below.
4. Power On the screen and Click the arrow sign on the screen.

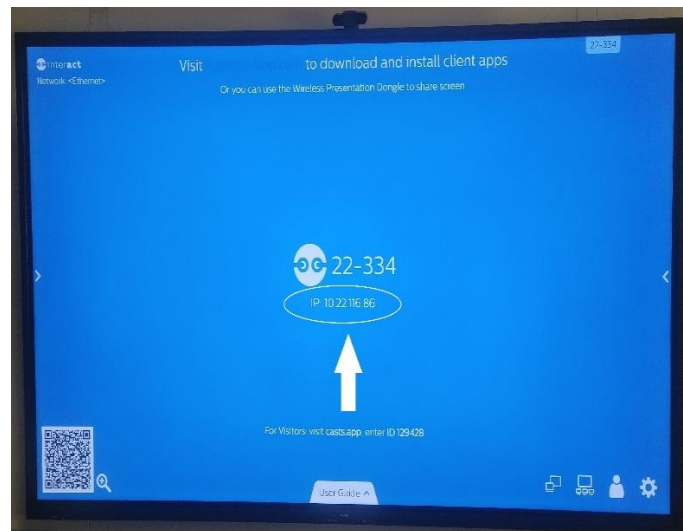

5. A new menu will pop up, click the Home button.

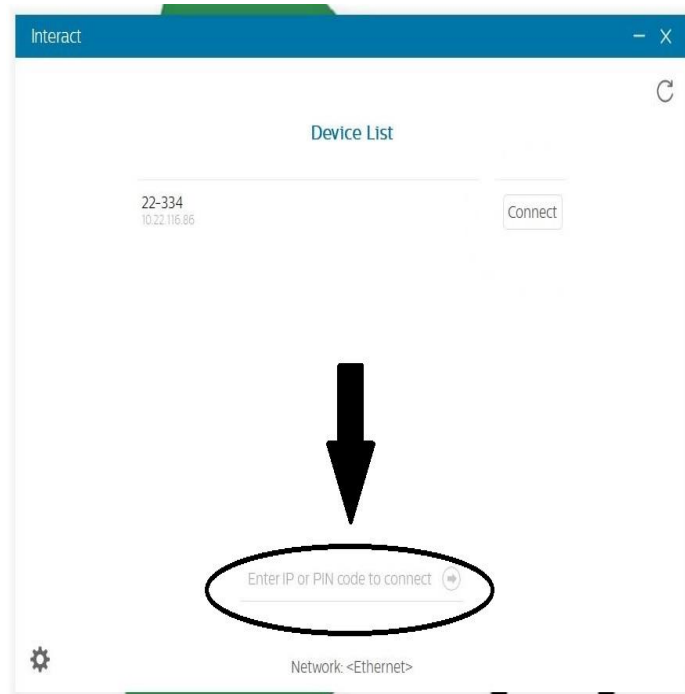

6. A new screen will show up with three options. Click on the "Present".

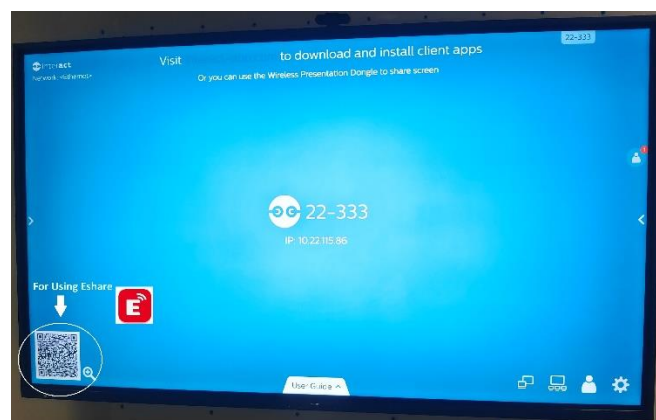

7. A new screen will show up with an IP Address.

8. Type the IP Address shown in the above step and connect.

9. **EShare** can also be used for mirroring or screen-sharing.
- Scan the QR Code at the bottom to connect a Mobile or Tablet.
 - Type the IP Address if using a Laptop to connect.
 - EShare can be downloaded from Microsoft Store.

3. How to use built-in Windows PC (OPS)

1. Power On the screen and Click the arrow sign on the screen.

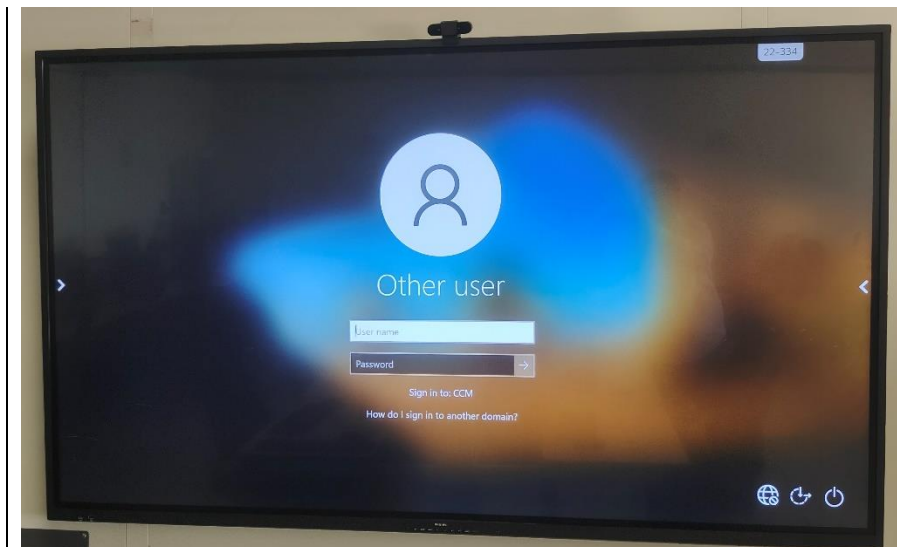

2. Press the icon mentioned in the picture.

3. Press the "OPS" button to use the built-in Windows machine.

4. Use **“CCM Account to Log on to OPS”**.

Note:

5. **AVOID** the use of an on-screen touch “Keyboard” if typing your username & password. A keyboard and mouse are provided for this purpose.
